The Megha-Tropiques mission

Successfully launched October 12th 2011 !

This morning 6:48AM

The Megha-Tropiques mission Overview

Indo-french mission realized by

**The Indian Space Research Organisation (ISRO) and the
Centre National d'Etudes Spatiales (CNES)**

Megha means cloud in sanskrit and tropiques means tropics in french

Dedicated to the

Water and energy cycle in the Tropics

**Low inclination on the equator (20°);
865 km height**

High repetitivity of the measurements

Raw data, numerical count channel 6

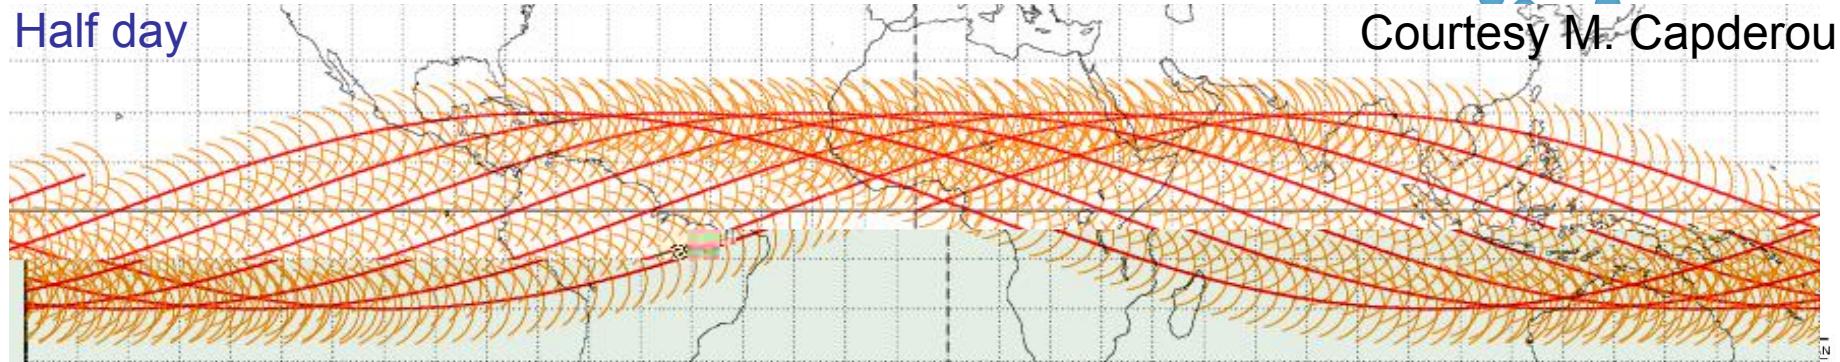

Megha-Tropiques

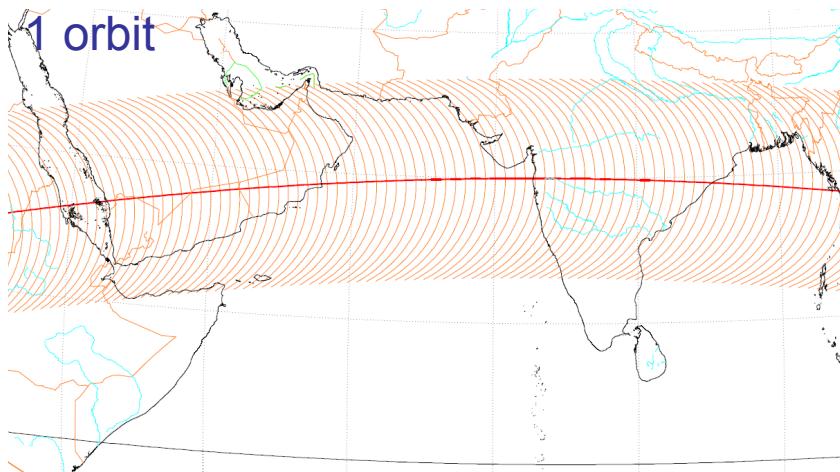

An equatorial orbit

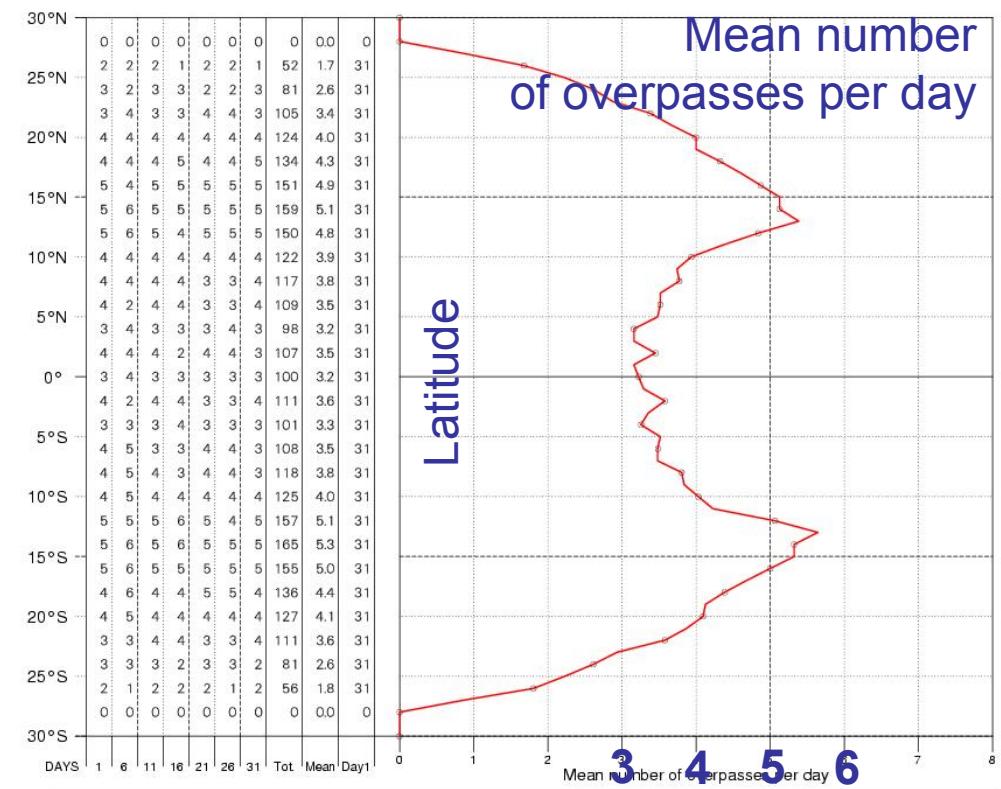

Half day

Courtesy M. Capderou

MADRAS sampling over 20°S-20°N
Min 3 per day
Max 5 per day

The Megha-Tropiques mission

Scientific objectives

Atmospheric energy budget in the intertropical zone and at system scale (radiation, latent heat, ...)

Life cycle of Mesoscale Convective Complexes in the Tropics (over Oceans and Continents)

Monitoring and assimilation for Cyclones, Monsoons, Mesoscale Convective Systems forecasting. NRT Activities

Level 2 rain retrieval from MW imagers

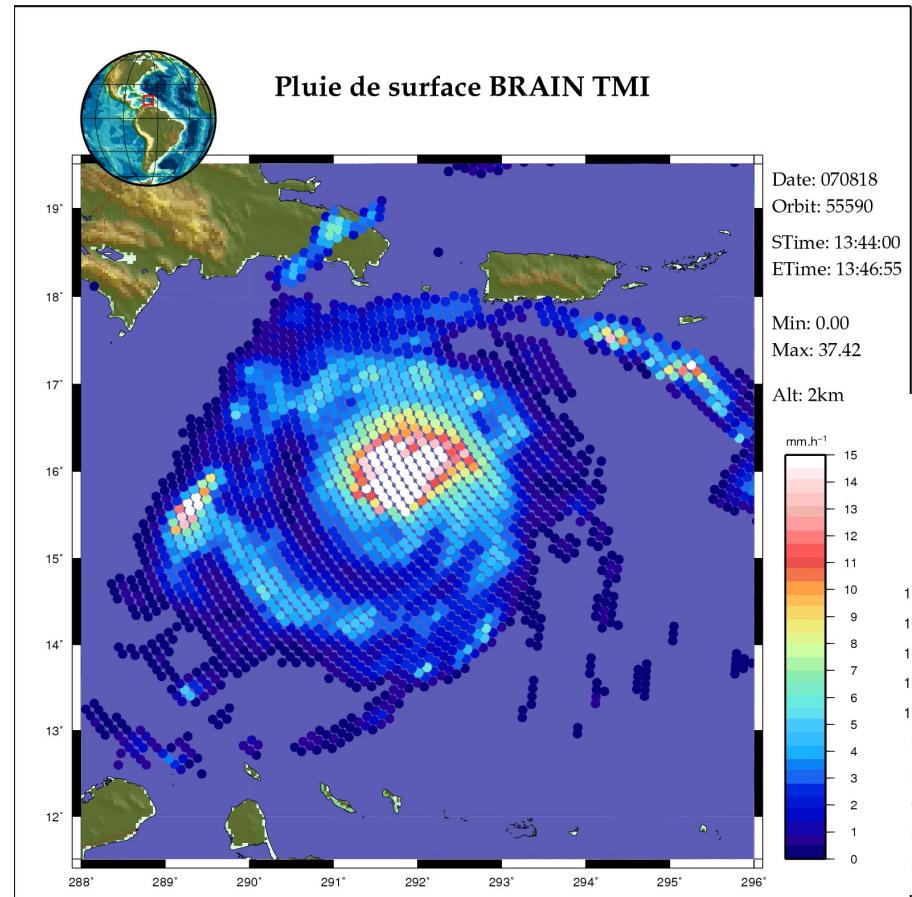

The BRAIN algorithm

Brain results (TRMM) over hurricane Dean (12kmx12km resolution)

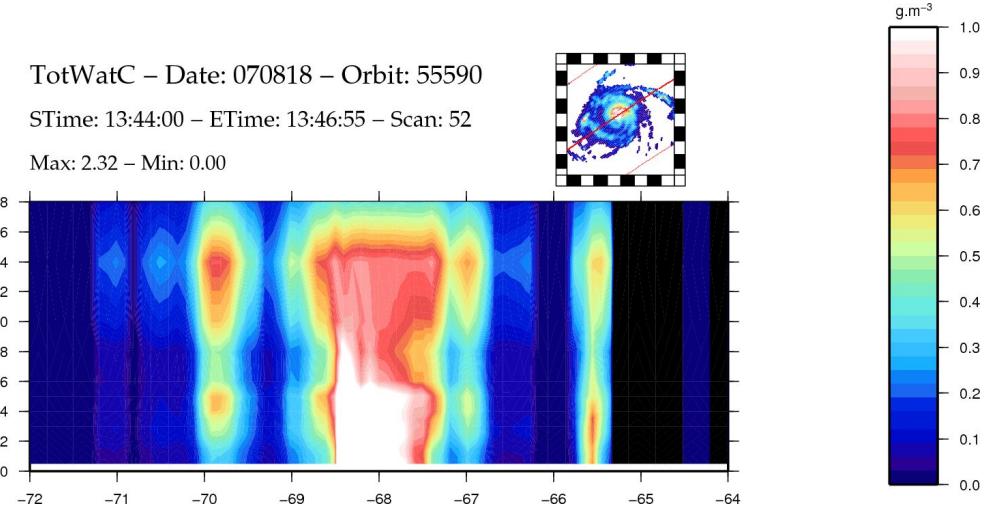

MADRAS will provide similar products but with lower resolution (25kmx25km)

Surface Rain

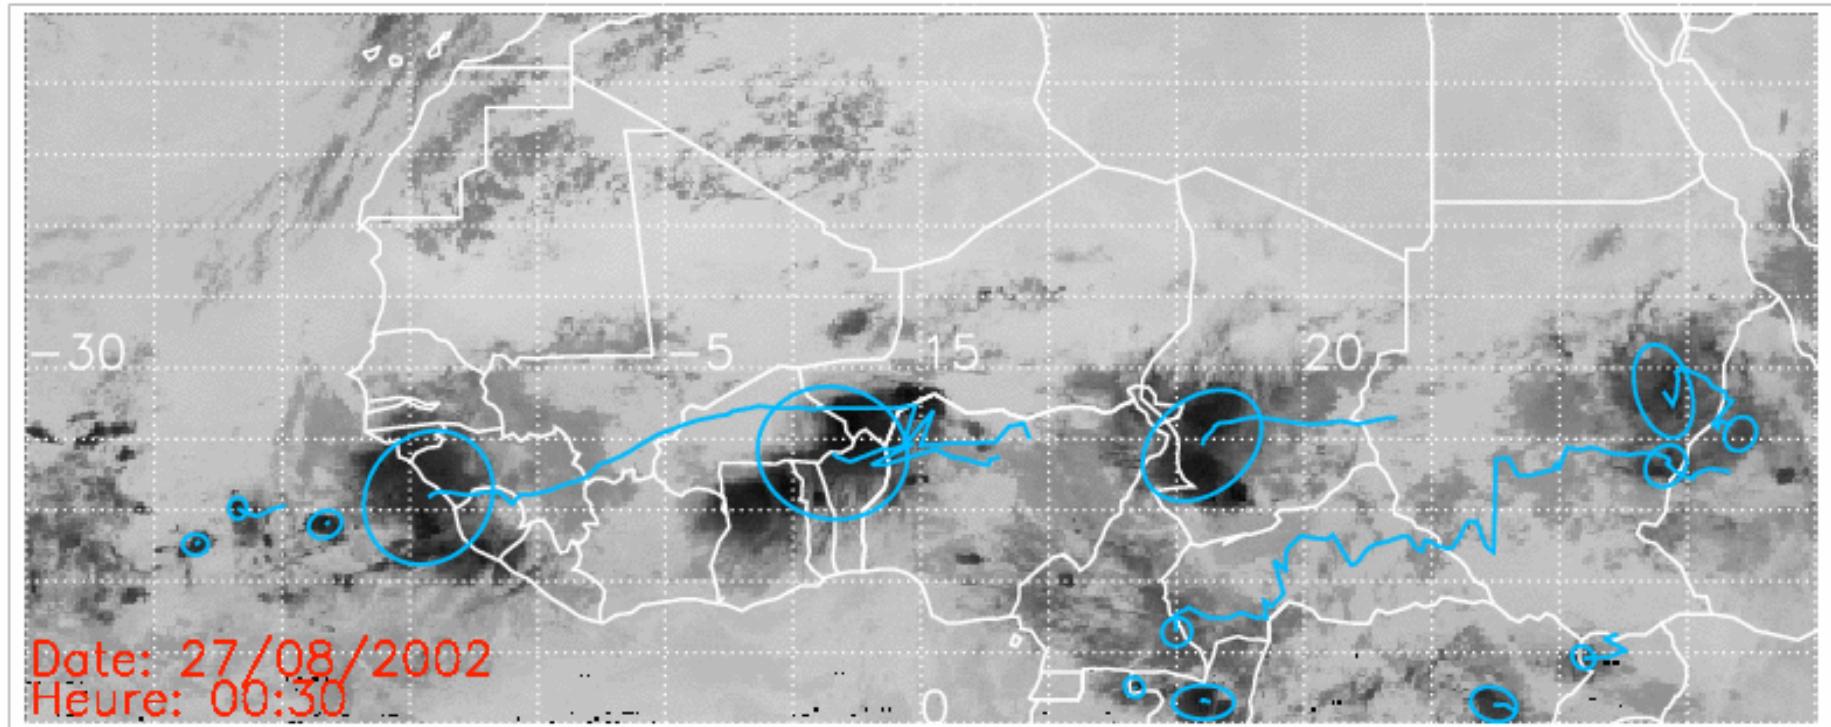

Viltard et al., 2011

Vertical cross-section of: rain,ice,liquid
and ice cloud [g.m⁻³]
14 layers

Life cycle of MCS in the tropics

Rainfall estimation over the tropics

Participation to GPM

- Satellite Legend
- DMSP I & II (SSMI)
 - TRMM (PR, TMI)
 - Aqua (AMSR-E)
 - ★ ADEOS-II (AMSR-J)
 - * DMSP/NPOESS I & II (SSMIS/CMIS)
 - ▲ GPM Core (DPR, GMI)
 - ◆ GCOM-B1 (AMSR-J)
 - × NASA-GPM1 (N-CMR)
 - △ International Partner
 - Megha-Tropiques (MADRAS)

Rainfall estimation over the tropics

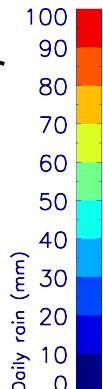

Level 4 Multi MW platforms + GEO

Tropical Amount of Precipitation with ERRors (TAPEER) – BRAIN

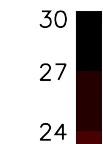

1°/1day

accumulated rainfall + Error

Instantaneous retrieval

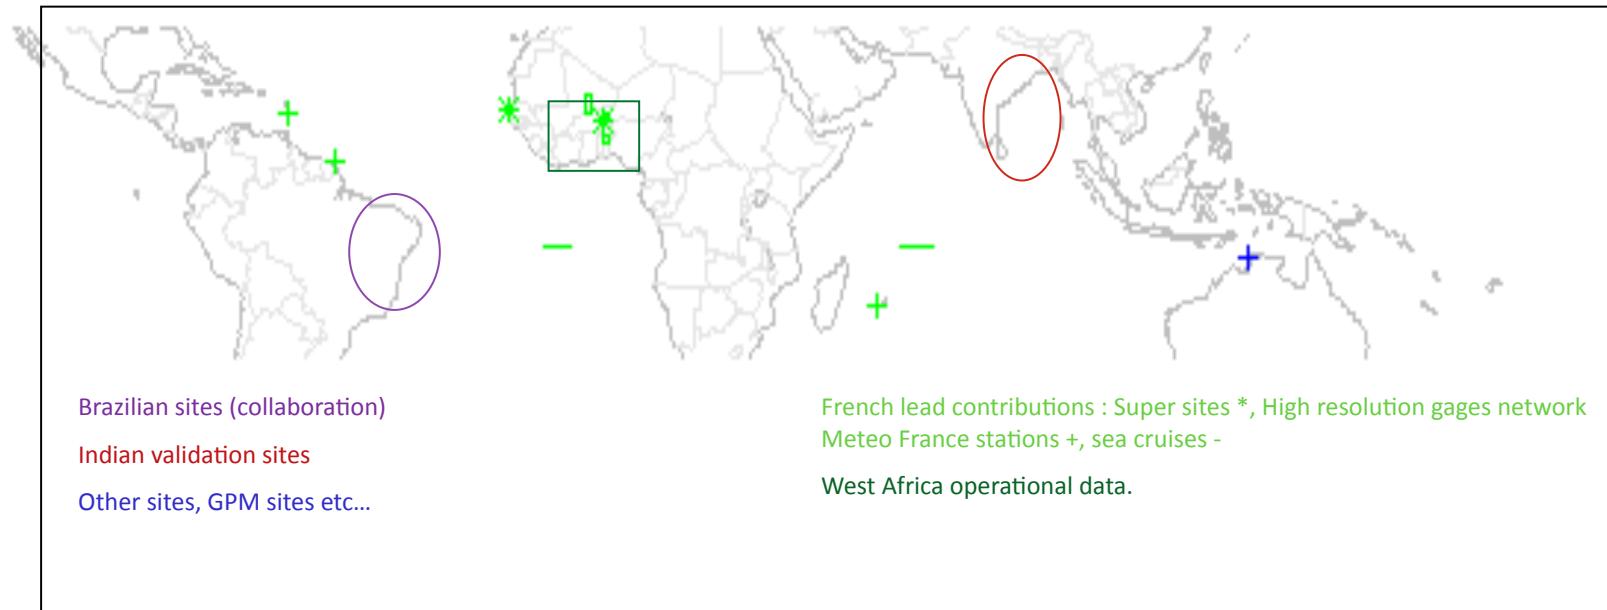

West Africa (Sahel)
(Kirstetter et al., 2011)

Brazil, India, West Africa
With the upcoming
Validation plan

Chambon et al., 2011

Validation effort International plan

Courtesy M. Gosset

Plan global –international collaborations

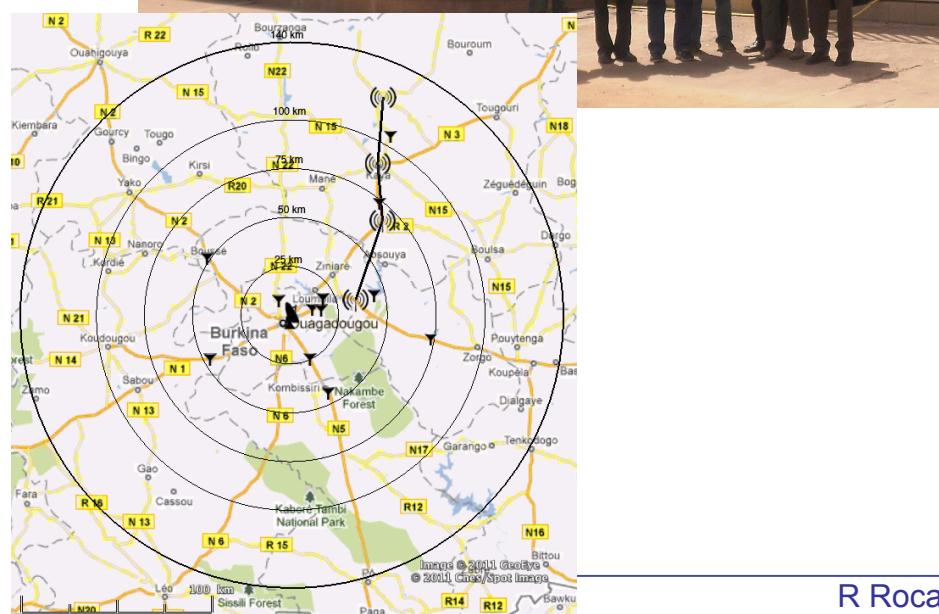

- India Brazil
- Sites GPM GV et data from IPWG.
- Meteo-France 'lame d'eau' (Guyana, Caribbean, Reunion)
- Collaboration In West Africa (AGRHYMET, DMN, MIT NASA, GPM GV)

A super site in West Africa

2011 : Relocation of the super site from Niamey to Ouagadougou
Burkina Faso

R Roca et al.

Algorithm Validation

Rationale

**Main source of uncertainties in TB simulation over land in the Tropics:
PSD parametrization in the Radiative Transfer Model**

- Set up some polarimetric Doppler radars to build a climatology of particles classification as a function of season, lifecycle, type of the system
- On a limited number of systems, perform **in-situ** measurements with a plane
- Come up with PSD properties where the plane flew and cross-reference it with the **radar** particles classification
- Set the parametrization in the RTM used to build the retrieval database rttov

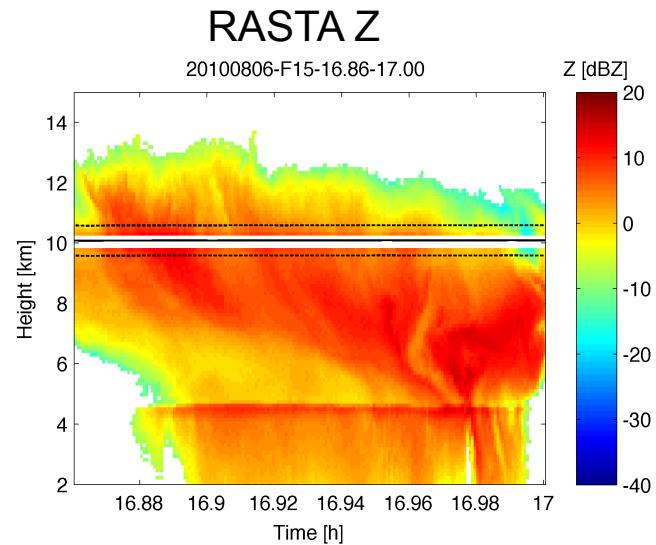

2 experiments:

- Niamey 2010: MIT radar, X-Port and Falcon 20 (in-situ + RASTA)
- DYNAMO 2011: SMART-R, S-PolKa and same Falcon 20

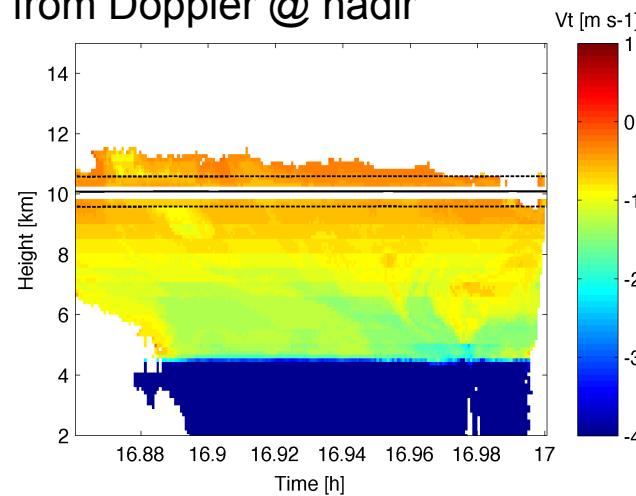

Algorithm Validation

First results

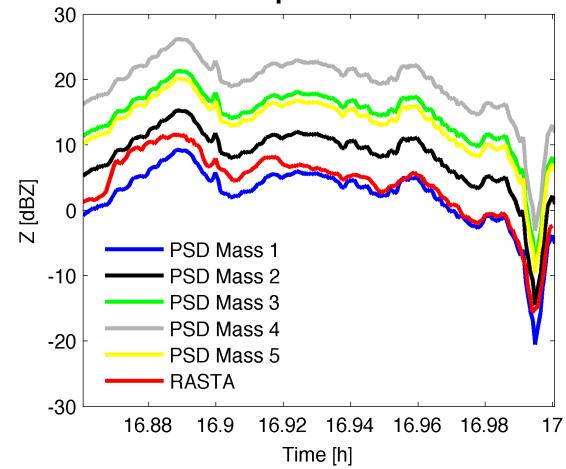

“Classical” case when best match is $m(D) = 2 \cdot 10^{-6} D^{2.2}$

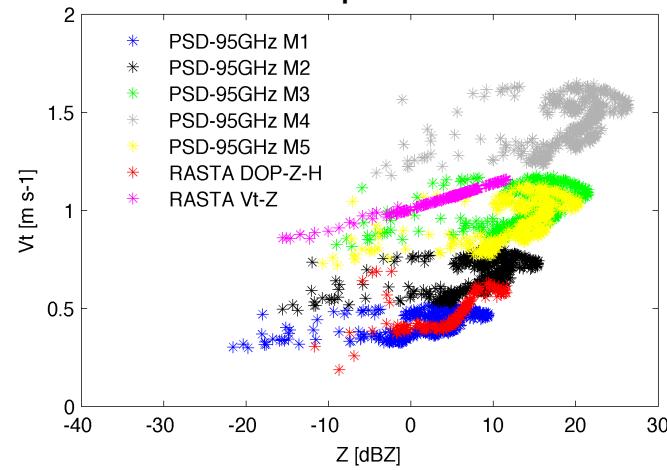

RASTA: Terminal fall (V_t) speed
from Doppler @ nadir

Heuristic look up for the best $M(D)$

Heuristic look up for the best $Z-V_t$

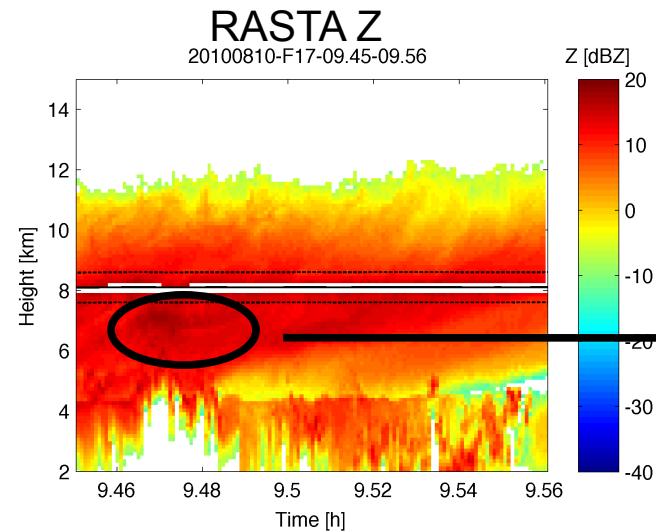

Courtesy N. Viltard et al.

Algorithm Validation

First results

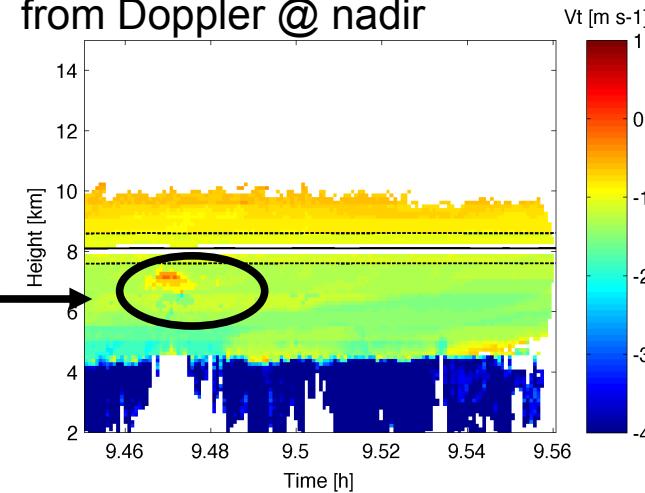

“unexpected” case when best match is more like $m(D) = 4 \cdot 10^{-6} D^{2.2}$

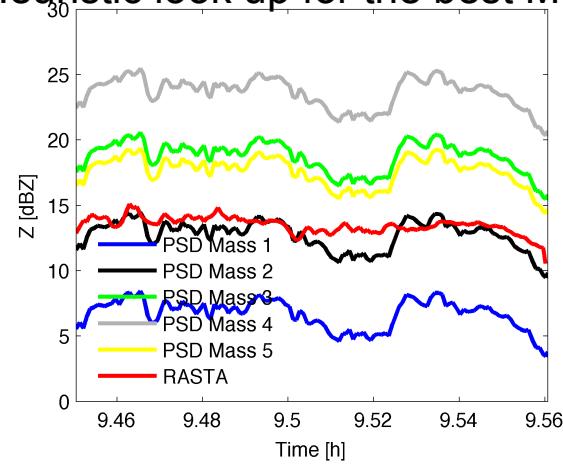

$m(D) = 4 \cdot 10^{-6} D^{2.2}$

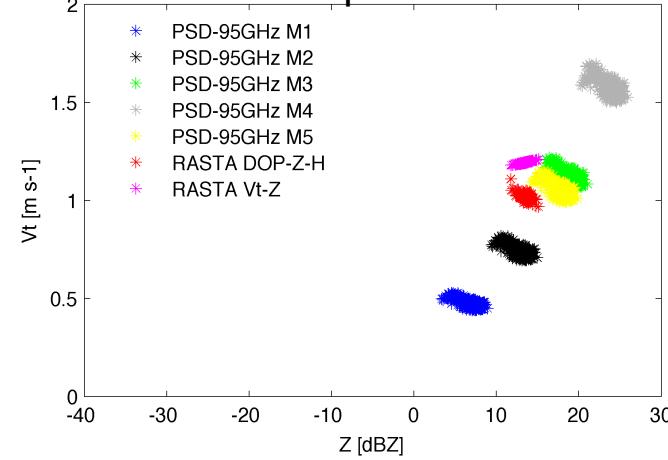

RASTA: Terminal fall (V_t) speed
from Doppler @ nadir

Heuristic look up for the best M(D)

Heuristic look up for the best Z-V_t

Courtesy N. Viltard et al.

Summary and conclusions

Schedule of events

Fall 2011

Commissioning

Participation to DYNAMO

campaign and aircraft operations
microphysics and algorithm validation

Early january 2012

L1 and up to the International Science Team
Calibration phase

Small workshop on « Methods for validation »
Bangalore, early May

Summer 2012

L1 and up « widely open »
Start of the NRT stream

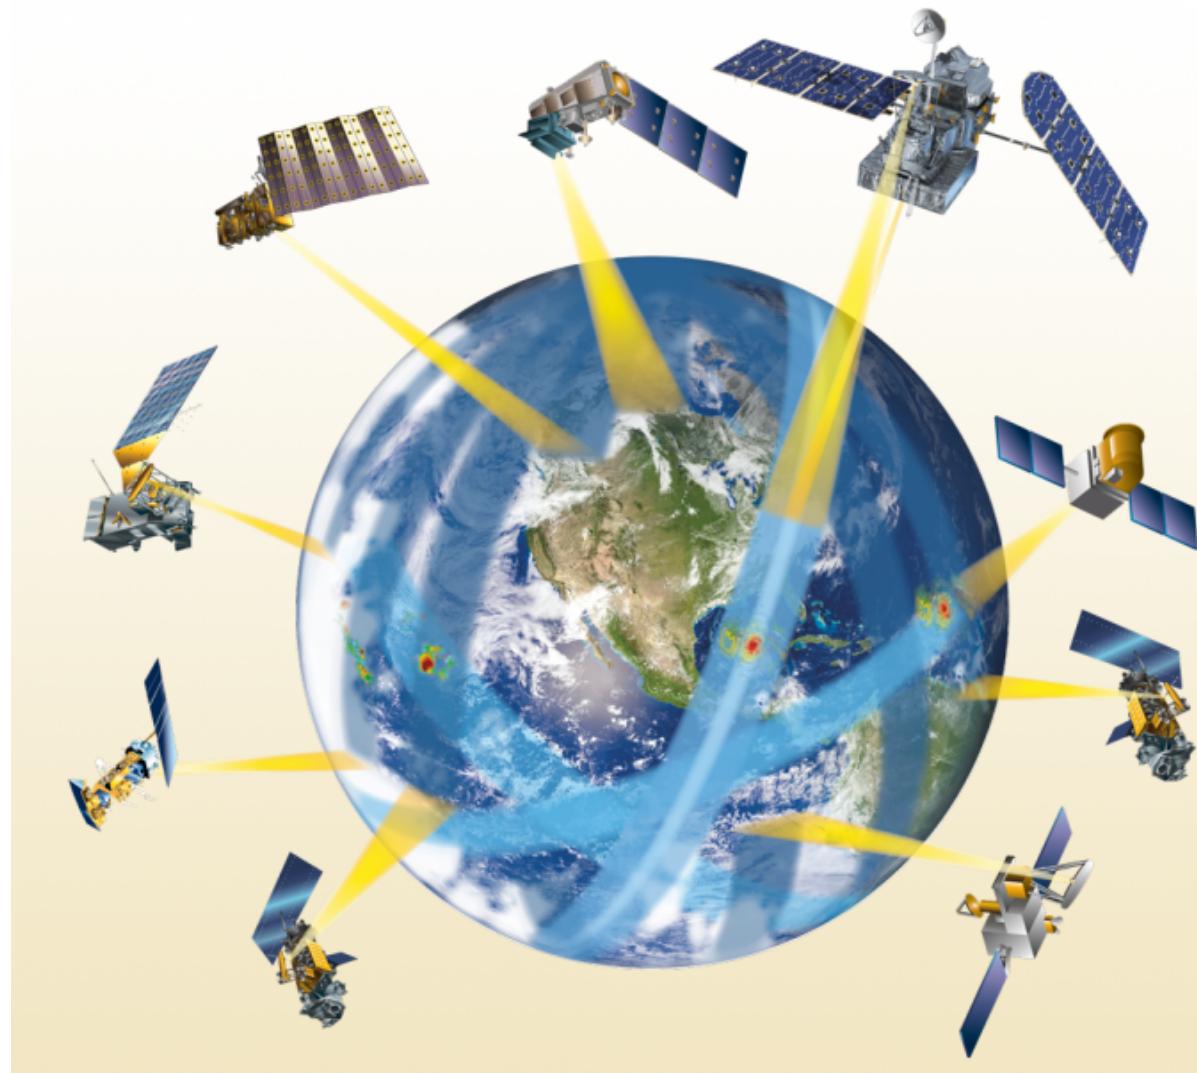

Participation to CTCZ 2012 (India)
West African Campaign
Rainfall and water vapor profile

Winter 2012-2013

First international scientific conference

WEB site <http://megha-tropiques.ipsl.polytechnique.fr>

Join our email list , send me a message

Thanks !

Extra

Une mission tropicale mais globale !

Un science team international !
